

2006 NEW PRODUCTS - PRELIMINARY SHEET

DLQ

◆ SOUND GENERATION

The **KeyB** is built around a new instrument modeling software by **Fredrik Kilander**, optimized for **KeyB** by **DLQ**.

◆ EASY TO SET UP AND PLAY

When you'll turn on the **KeyB** you'll definitely feel at home! Every control is located in the right place...

◆ REVERB AND ROTARY SIMULATION

The **KeyB** has built-in rotary simulation and reverb.

◆ HARMONIC TOUCH PERCUSSION

Soft/Normal volume, Fast/Slow decay, 2° and 3° Harmonics and adjustable percussion master volume control in the back of the organ.

◆ MIDI IMPLEMENTATION

All the functions are sent and received via MIDI IN/OUT.

◆ VERY LIGHT WEIGHT

It's very easy to carry the **KeyB** (less than **25 kg**)...!

◆ FULL COMPLEMENT OF DRAWBARS

Two sets of nine drawbars for each manual and two drawbars for the pedalboard.

◆ VIBRATO AND CHORUS

Chorus/Vibrato 1-2-3 with On/Off switch for each manual.

◆ Local ON/OFF

Both manuals and the pedalboard can control an external sound generator in split or layer mode.

◆ KEY B2 - KEY B1 - KEY B2 Master and KEY B1 Master

The **Key B1** single manual version is also available, and if you would like to use another tonewheel generator the double/single manual **Master2 and Master1** keyboards are exactly what you need!

The manufacturer can change some of the above-mentioned features to improve the product without notice.
